

## EDB to PST Converter

### EDB to PST Converter software to Convert EDB to PST

MS Exchange Server is the server side application that securely works in collaboration with MS Outlook. This Microsoft Outlook is an email client's application that manages the emails, calendars, task, notes and another business-oriented task of the all users. ([Free EDB to PST Recovery](#)) The Exchange server stores data in EDB format and Outlook in OST file and PST format. When Microsoft Exchange is online then OST are generated on the Microsoft Outlook at the client/ user's machine. The Outlook OST files are also known as offline storage table that is duplicate copy of Exchange EDB files. The Outlook grips extremely very unique and safe efficient feature that allows all users to work in an offline mode. The offline mode is a mode when MS Exchange server is not energetic, in that case also all users can continue his work using outlook OST files.

### Why need of EDB to PST Conversion?

- The significant reason of conversion emails from EDB file to PST file is to maintain backup. The PST format is an easily and safely accessible format and supported by only MS Outlook but also by another email client application.
